Ventum III
Heat Powered Stove Fan

FIR363

The new Ventum III is an evolution of our popular Premium 4 fan, engineered to feature a triple blade propeller design.

At 199mm high the Ventum III fan starts to rotate at an ultra low surface temperature, due to the newly designed easy start motor. The unique triple blade design pushes air quietly and effectively over a greater distance than other models, featuring our advanced radiating fin design extrusion to generate maximum airflow. The triple blade design produces less drag than the 4 blade but more thrust than a 2 blade fan.

Designed to start at a temperature as low as 45°C, the fan requires no batteries or external power. Heat is conducted though the base of the fan and converted to electricity which powers the fan motor. With a durable, hard wearing black anodised finish, the fan automatically slows and stops as the heat from the stove reduces.

- Compact, modern and sleek design
- Ultra low 45°C starting temperature – perfect for early starting*
- Maximum air flow – blows up to 420 ft minute
- Thermally controlled actuator for optimum Peltier performance
- Dynamically balanced fan for unrivalled motor life, balance & output

* Under test conditions. Actual starting temperature varies according to stove, installation and environment.

Specifications:

Height (including blade) 199mm

Width (including blade) 180mm

Depth 98mm

Base plate width 110mm

Weight 550g

- Easy starting at 45°C (113°F)
- Maximum operating temperature 320°C (600°F)
- Optimum operating temperature range 80 - 250°C (175 – 480°F)
- Inbuilt protection system to stop the fan overheating
- 24 months materials & workmanship guarantee
- Designed & engineered in the UK
